

# Frooby the Dragon

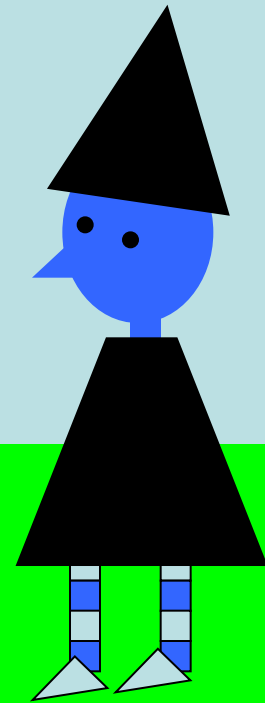

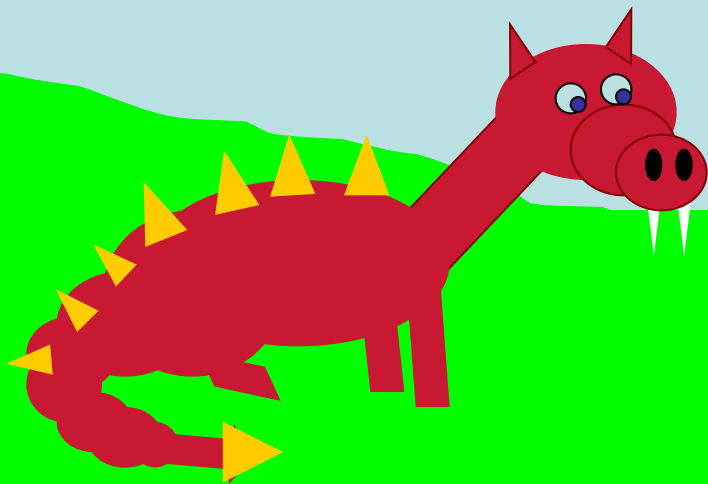

**Once upon a time there was a  
little, red dragon called Frooby.**

**One day a blue witch appeared  
in front of Frooby with a flash!**

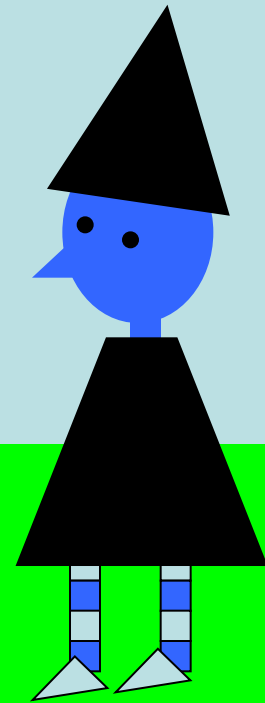

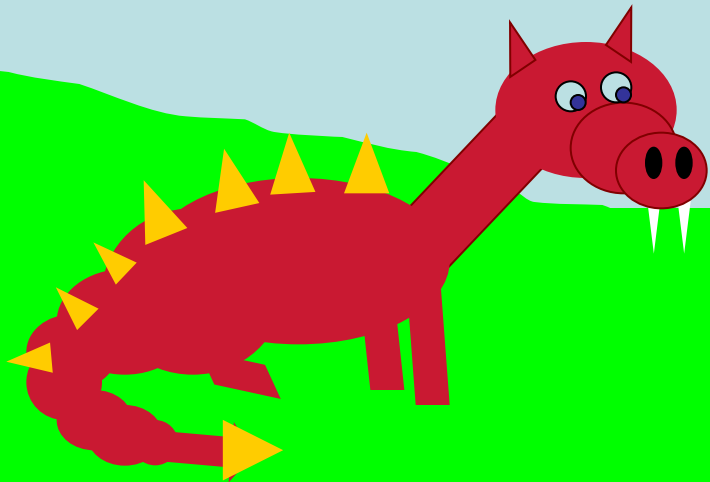

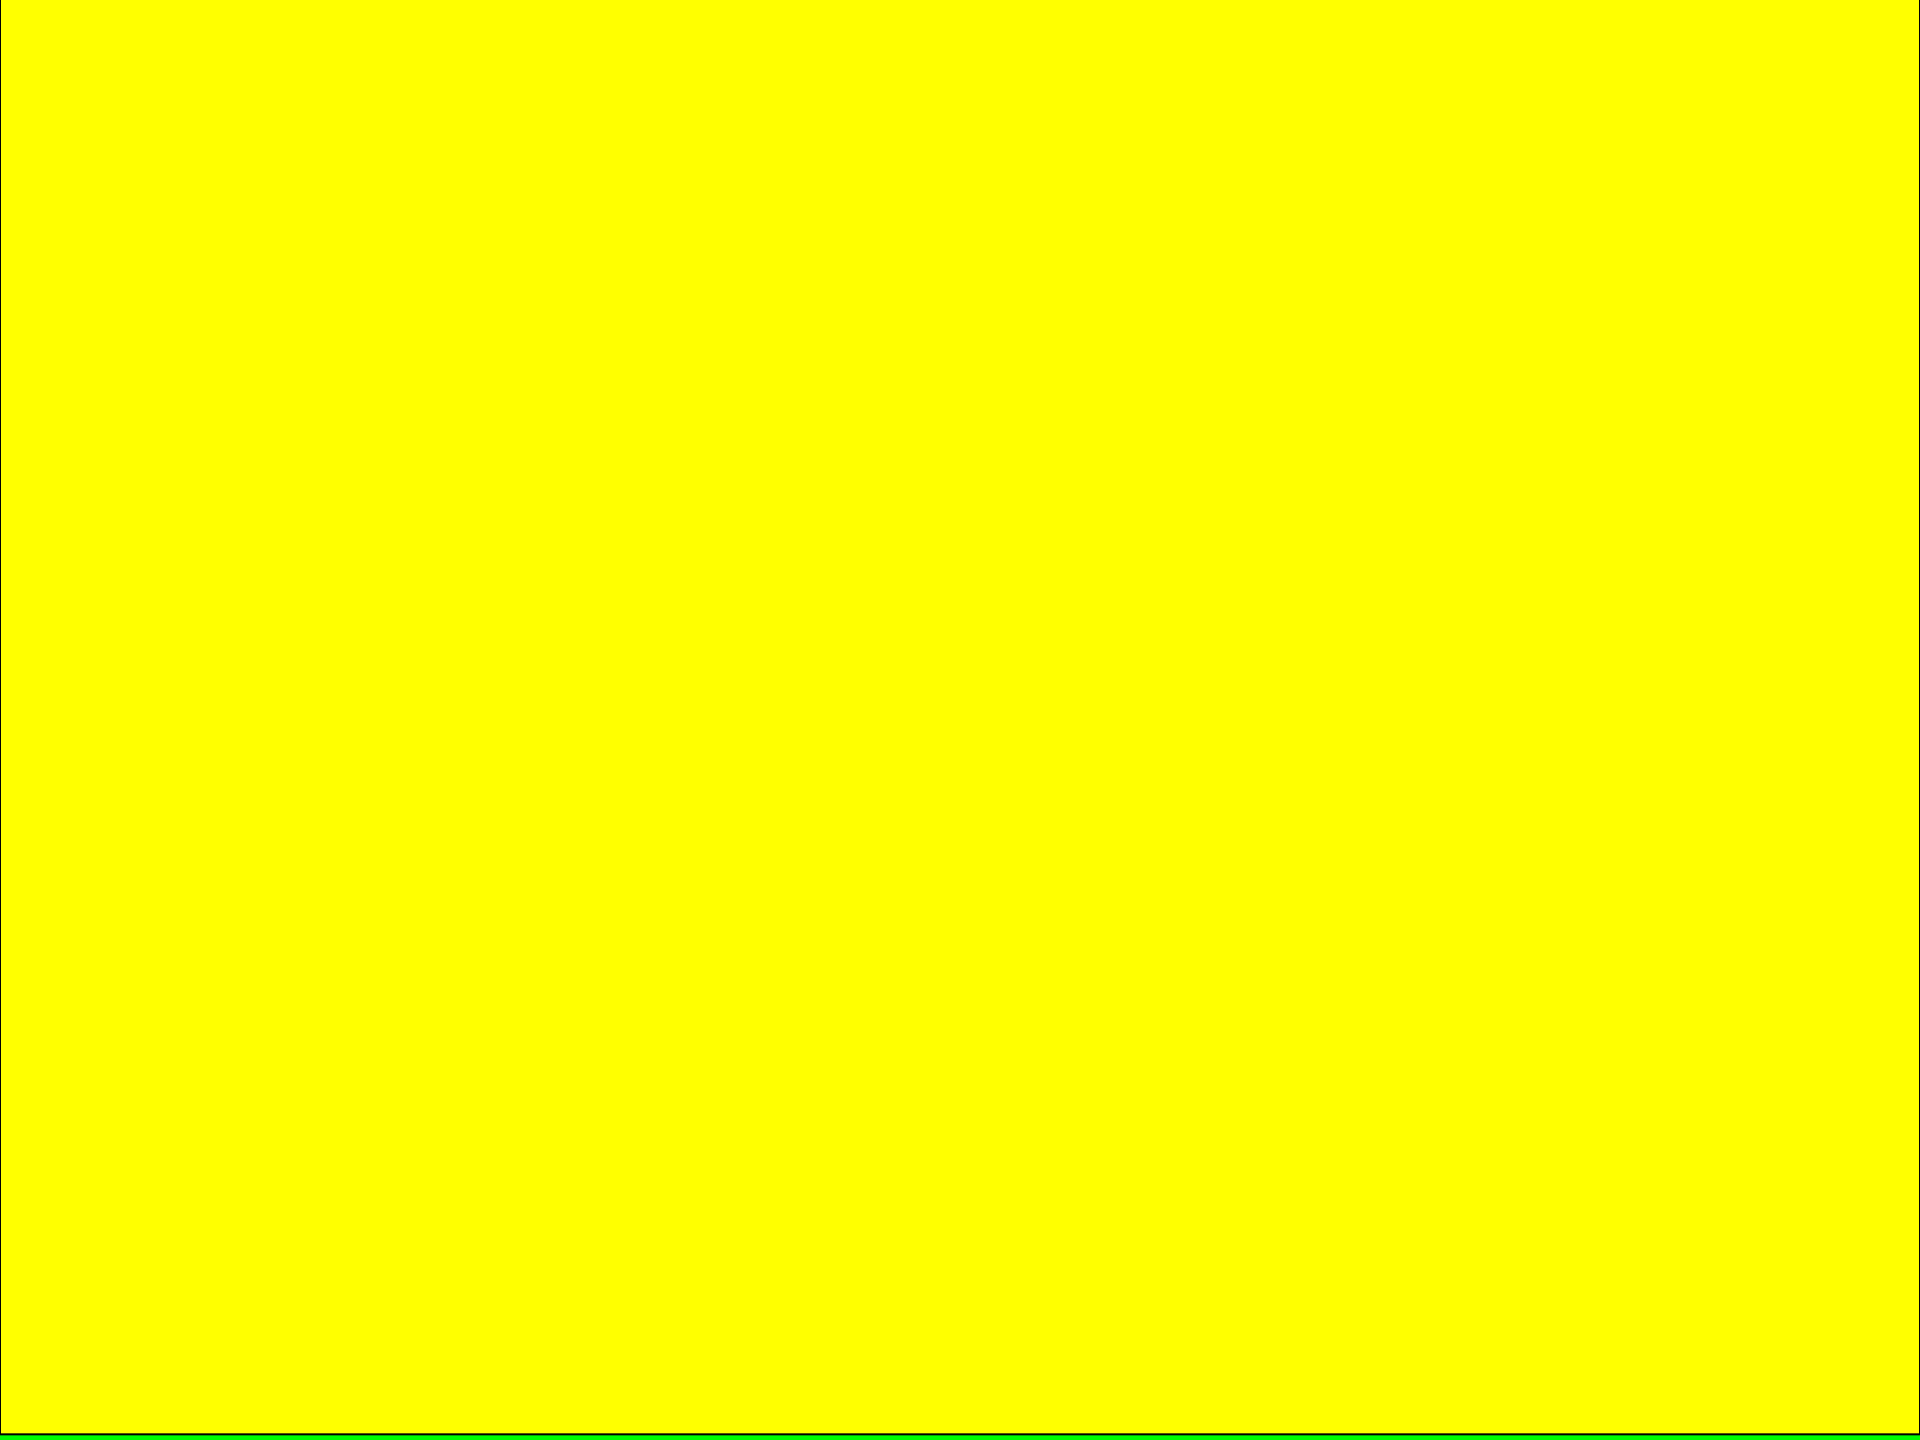

**“Ha ha ha!” she cackled,  
“Frooby I will have some fun,  
I’m going to double up the  
sun!”**

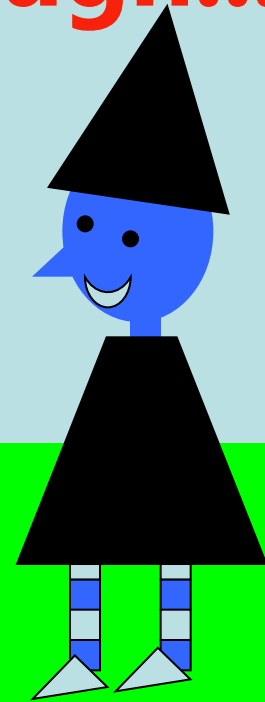

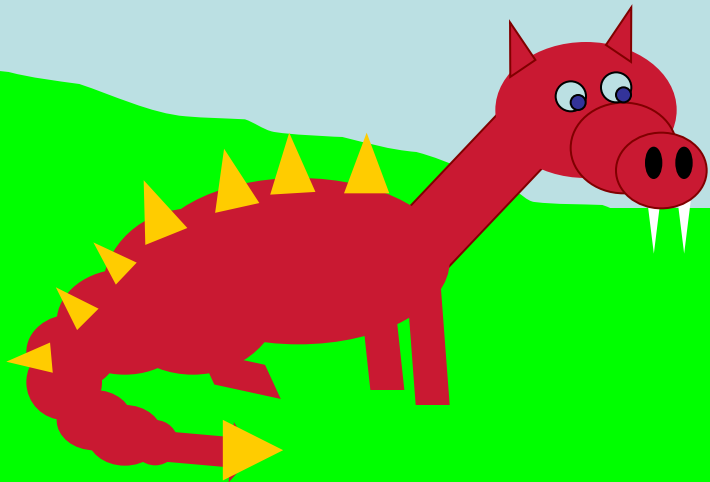

**“Double one?” puzzled Frooby.  
“One and one = two suns!”**

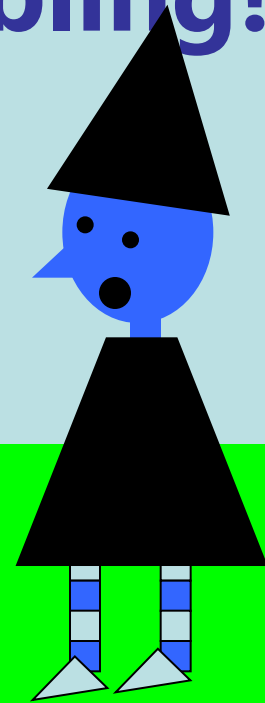

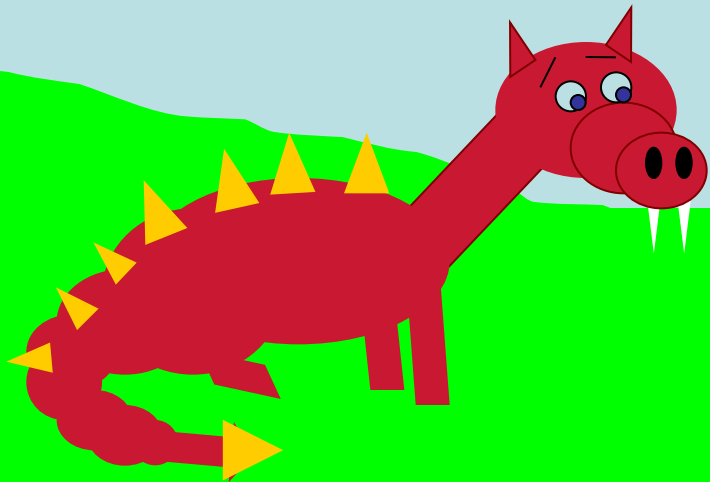

**“Tee hee, two suns!” giggled  
Frooby. “It is a bit hot though...”**

**“Oh no! I can’t stop the spell!  
The suns will keep on doubling!”**

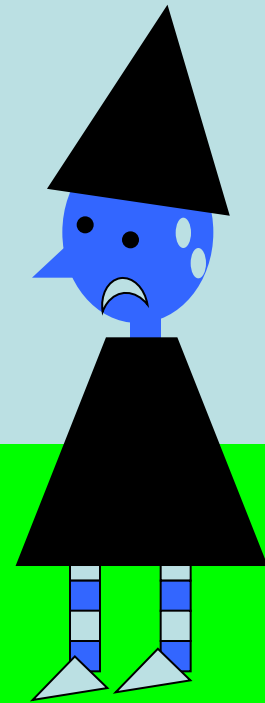

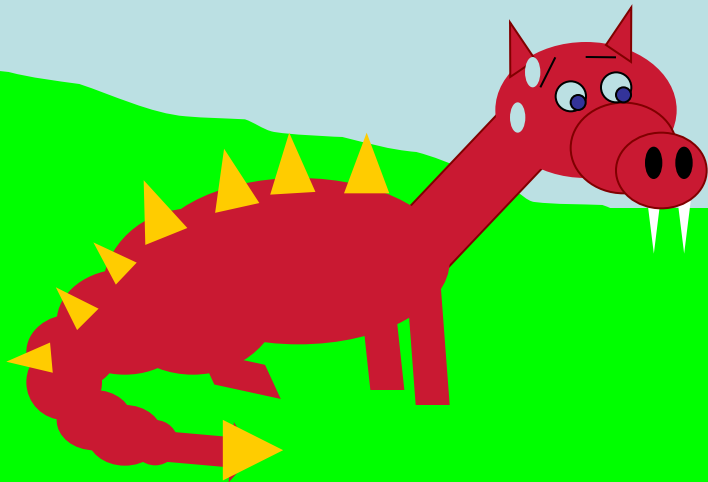

How many suns will  
there be now?

And now?

And what about  
now?

**“Quick Frooby! Use your maths,  
Halve those suns and make it  
fast!”**

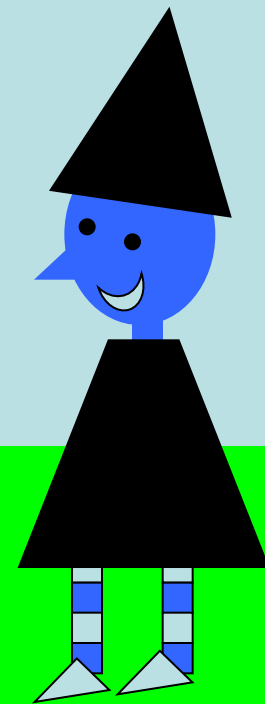

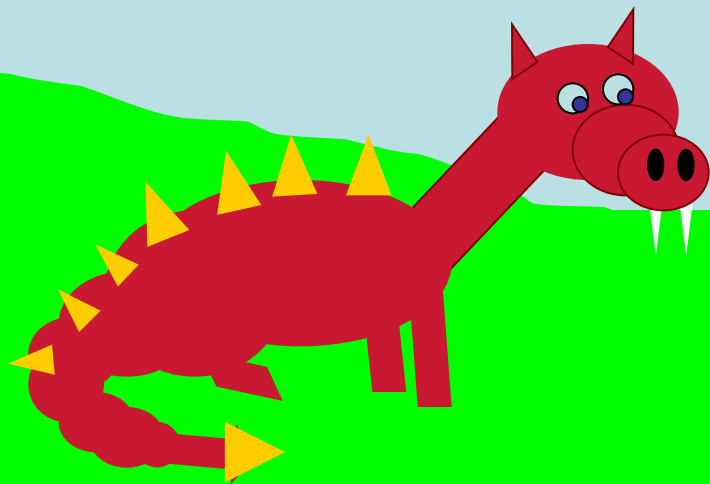

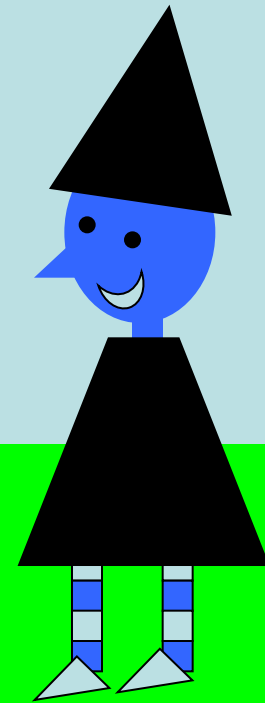

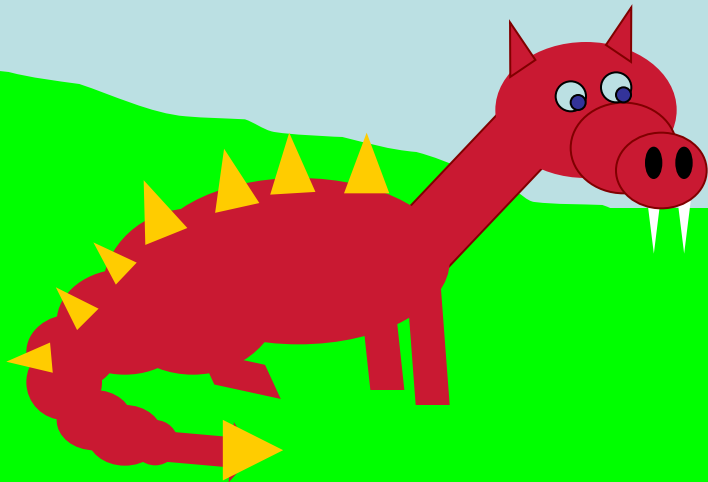

**“Fantastic Frooby! You’re a star!**

**With maths like that you will go  
far.”**

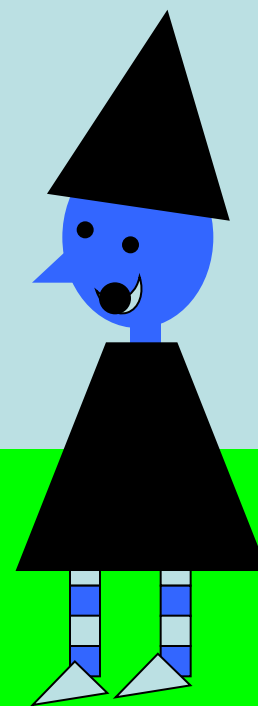

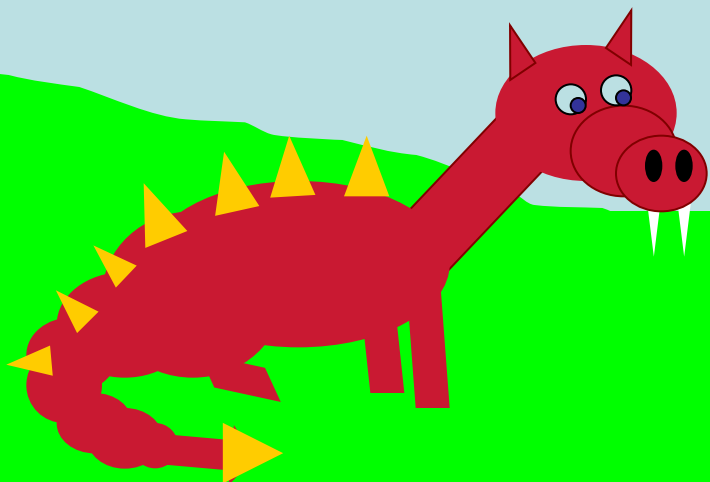

**“Would you like to see my tripling spell?” said the blue witch laughing.**

**“No!” said Frooby  
quickly.**

The End
